

QUICK HOMEOWNER GUIDE TO THE CONTROLS PACK : TQX0070

SINGLE ZONE THERMAQ CONTROLS SYSTEM

PROGRAMMABLE ROOM THERMOSTAT

What is a Programmable Room Thermostat?

A Programmable Room Thermostat combines a timer and thermostat in one unit by allowing you to set your desired comfort temperature at different times during the day.

The ThermaQ programmable SmartStat can operate as a 7 day, 5/2 day or 24 hour Programmable Room Thermostat with either 4 or 6 time and temperature events per day.

The ThermaQ programmable SmartStat also includes energy saving technology, TPI and Delayed Start as well as the safety feature of Landlord Service. All of these options can be turned on or off depending on user preference.

Displays the operating mode (Auto, Manual All Day, Off)

Cancels and returns to the previous menu

Room Temperature

Dial to adjust temperature and parameters. Temporary Overrides (adjust the set temperature up or down until the next programmed event).

Flame symbol indicates the system is calling for heat

Either confirms and saves the setting, or moves you to next option within a function.

Pre-set Temperatures:

Event	Time	Temp	Event	Time	Temp		
Weekends	1	06:00	20°C	Weekends	1	07:30	20°C
	2	08:00	15°C		2	09:30	20°C
	3	12:00	15°C		3	11:30	20°C
	4	14:00	15°C		4	13:30	20°C
	5	17:00	21°C		5	16:30	21°C
	6	22:00	15°C		6	22:30	15°C

N.B: If 4 Events is chosen then events 3&4 are skipped

Factory Set Programme

The ThermaQ programmable SmartStat has a pre-set programme which suits most people.

If the unit is installed as a 7 day thermostat, the pre-set settings are the same as the 5/2 day programme. If the unit is set as a 24 hour thermostat, the pre-set settings are the same as Mon-Fri of the 5/2 day programme.
